Portfolio

EDUCATION

- INSEA, Rabat** Sept 2023 – Present
State Engineering Degree in Data and Software Engineering Rabat, Morocco
- FST Al Hoceima** Sept 2021 – 2023
DEUST in Mathematics & Computer Science & Physics - Honors: High Distinction Al Hoceima, Morocco

PROFESSIONAL EXPERIENCE

- OCP Solutions** February 2026 – Present
Consultant Intern Casablanca, Morocco
 - Participation in defining the technical architecture within a real project with OCP Group
 - Contribution to the design and development of technical solutions adapted to business needs
- GhaythApp** August 2025 – October 2025
FullStack Developer Agadir, Morocco
 - Development and maintenance of a web platform using Node.js/Express.js, including new features (payments, dashboards)
 - Implementation of automated testing and CI/CD with GitHub Actions to ensure code quality
 - Backend performance optimization and MongoDB database tuning, bug fixing, and security improvements
- 3D Smart Factory** July 2025 – August 2025
Data/AI Intern Mohammedia, Morocco
 - Development of a configurable 3D preprocessing pipeline (NIFTI) and dataset structuring
 - Training and evaluation of a 3D UNet model using PyTorch with performance tracking

PROJECTS

- JobMatch – Intelligent Job Recommendation Platform**
Full-stack application for job/candidate matching based on AI
 - Technologies: FastAPI, Python, PostgreSQL, SQLAlchemy, Next.js, React, TypeScript, Docker
 - Multi-criteria scoring system based on AI for automated job recommendation
- Odoo ERP Module for Business Travel Management**
Development of a complete module with validation workflow
 - Technologies: Odoo, Python (ORM), XML, Docker, PostgreSQL
 - Multi-level validation workflow, automatic calculations, notification system, and granular security
- Real-Time Medical Records Analysis Platform**
Backend and real-time notification system
 - Technologies: Spring Boot, Hibernate, MySQL, Spring Kafka, WebSocket, Postman
 - Development of RESTful APIs and integration of Kafka for automatic alerts in case of anomalies
- Data Warehouse for Customer Reviews Analysis of Banking Agencies**
ETL pipeline and data analysis of Moroccan banks
 - Technologies: PostgreSQL, DBT, Google Maps API, Python
 - Building a data warehouse with automated ETL processes to provide insights on customer satisfaction

TECHNICAL SKILLS AND KNOWLEDGE

ERP: Odoo, SAP

Data & AI: Machine Learning, Deep Learning, OCR, RAG, LLM

Backend Development: Java (Spring Boot, Hibernate), PHP (Symfony), Python (Flask), C/C++, JavaScript (NodeJs, Express)

Databases: PostgreSQL, MySQL, Oracle, MongoDB, Redis

Frontend Development: HTML5, CSS3 (Bootstrap), JavaScript(Next.js, React)

DevOps & Testing : JUnit, Jest, Mocha,Git, GitHub, GitHub Actions, Docker, Postman

Data Analysis & Statistics: Python (NumPy, Pandas, Matplotlib), MATLAB, R, SPSS

Modeling: UML (Class diagrams, use cases, sequence), Merise (Conceptual, Logical, Physical)

CERTIFICATES

SAP SuccessFactors HCM Solutions — **SAP** · Database Programming with SQL — **Oracle Academy**
